

YOU CAN BE AN ENERGY SUPER SAVER

Saving Energy means saving money, conserving our fossil fuels, and helping to protect our environment. There are lots of ways to save energy, so let's get started!

1. Let the sun shine in! During the day when it is brighter outside, open the curtains and use the sunlight instead of turning on the lights.

2. Don't leave windows or doors open when the heat or air conditioning is on. This makes the furnace and AC have to work harder to heat and cool a room.

3. Save Water!! Don't leave the water dripping in the faucet and shower.

HOW MANY ENERGY SAVER IDEAS CAN YOU THINK OF?

4. Turn off the dishwasher right before the drying cycle and let the dishes air dry.

5. Don't leave the refrigerator door open. Decide what you want BEFORE you open the door.

6. Instead of cooking, once a week have a sandwich night. Not cooking on the stove or in the oven saves gas and electricity.

7. Turn off lights, televisions, stereo's and other appliances when you leave the room.

9. Install energy saving light bulbs on lamps and fan lights.
